

My Experience in the AI and Cloud Technologies Internship by AICTE, Edunet Foundation and IBM Skillsbuild

My **AICTE** Internship in **AI and Cloud Technologies** by **Edunet Foundation** in collaboration with the **IBM Skillsbuild** was a wonderful learning experience. It gave me the opportunity to explore modern technologies and gain practical knowledge.

During the internship, I learned about Artificial Intelligence, cloud computing, **IBM Cloud, watsonx, Graneti models**, and **AI agents**. The sessions helped me understand both the concepts and their real-world applications. I worked on hands-on projects, including developing AI-powered agents. These projects allowed me to apply my learning and improve my problem-solving and technical skills. This internship improved my confidence in working with AI and cloud technologies. It also enhanced my teamwork communication, and analytical thinking.

In this 4-weeks internship I have made a project based on Artificial Intelligence (Healthcare Appointment Agent – HealthConnect AI) using watsonx Orchestrate, watsonx.ai and IBM Bob. This project helped me in applying AI to real-world scenarios.

I sincerely thank the mentors and organizers for their continuous guidance, encouragement, and support throughout the internship. Their expertise made the learning journey engaging and enjoyable. I would highly recommend this internship to anyone interested in building a strong foundation in AI and cloud technologies.
